Our areas of expertise

Bespoke Development

Developing a new application from scratch to serve new business requirements.

Highly scalable, cloud-native applications with a web front-end.

Modernisation

Bespoke software running on-premise. Migrating to the cloud as maintenance gets more and more expensive.

On-prem web apps, 2-tier desktop apps, etc.

Integration

Connecting applications to work together in joint workflows.

Middleware layer instead of P2P integrations.

Azure Integration Services challenges expensive incumbents like MuleSoft.

Cloud Data Engineering

Building scalable data processing, analytics and reporting solutions on the Azure data stack and harnessing the features of Power BI and AI platforms.

Managed Services

Monitor cloud applications, remediate issues. Proactive maintenance. Updating code base to follow latest trends and technology.

Business confidential

Our approach

- **Agile** Delivery (**Scrum** framework), unless otherwise requested by the client
- **Discovery & Design** Phase
- **Build** Phase: typically 2-week sprints
- **Cloud-native tooling**: Azure DevOps, Scrum boards, Git, CI/CD pipelines, Visual Studio, SharePoint, Microsoft Teams, etc.
- **Automated** testing and deployments

Some of our clients

Rail Net Europe is an association of European Rail Infrastructure Managers, serving as an umbrella organisation that helps coordinate its Members' international processes in the areas of Capacity Management, Traffic Management, Corridor Management, IT and Sales & Legal Matters.

We have been working with Rail Net Europe since 2021 providing software development and software maintenance services.

Riskoncise has the power to revolutionise the way risk is understood, modelled and managed on projects of all sizes. With intuitive workflows, automated actions and cutting-edge reporting, their user-friendly solution frees up headspace for risk specialists and project professionals to focus on the things that really matter.

We have been Riskoncise's software development partner from the beginning.

LA NET helps customers throughout Europe and the US on their cloud adoption journey. Using the latest features and Microsoft best practices, LA NET customers benefit from having an optimised and secure environment.

Our software development team partnered with LA NET on an Azure AD and single sign-on integration of a customer application.

… and a lot more

We are proud to have amongst our clients some of the world's leading companies in the

- Transportation and logistics
- Financial & Professional Services
- Health & Life Sciences
- Construction

industries.

Business confidential
