Unifying trusted AI and Cloud Innovations to Empower the Financial Services Industry

In the era of AI, economic pressures and competitive challenges compel the financial services industry to develop more personalized and innovative solutions

- **Silos and data surge and dispersal** impede collaboration and access to all relevant financial information
- **Outdated technologies and lack of training** on digital solutions cause errors and frustration
- **Manual, repetitive tasks** lead to burnout, limit productivity and innovation
- **Rising cyberthreats demand innovative financial platforms** to protect sensitive data and keep pace with regulatory requirements

$5 Trillion Increased IT spending: Financial organizations are expected to **increase IT spend by 8%** from 2023 to 2024 reaching **$5 Trillion.**
