OneVuex UNIFIED SYSTEMS | IBM Silver Partner

Unifying trusted AI and Cloud Technologies to Accelerate Government Innovation

Governments must expand their digital presence due to rising expectations, global turmoil, and cyberthreats, but many struggle with digital transformation.

- **Silos and data dispersal** impede access to information, stifle collaboration, and create operational inefficiencies
- **Outdated technologies and methodologies** fail to keep pace with business needs and market demands
- **Manual, repetitive tasks** lead to burnout, limit productivity, and impede innovation
- **Sophisticated cyberthreats exploit gaps in siloed security which** security professionals often lack the experience or tools to defend

Top Global Government Technology Trends

60% will prioritize **business process automation** by 2026 (Hyperautomation approach)

60% of **AI and Analytics investments** will impact real-time operational decisions and outcomes

75% of CIOs will oversee **security** beyond IT, requiring an **integrated adaptive approach**

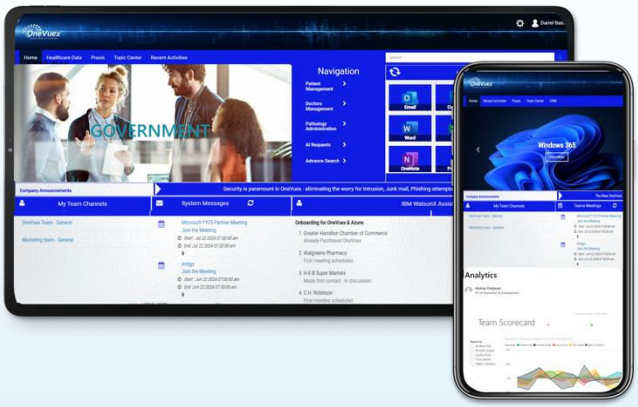
Introducing OneVue*x* Unified Systems

OneVue*x* Unified Systems intelligently integrates **IBM**, **Microsoft**, and other technologies, unifying data across applications, databases, and cloud platforms, displaying related data results **in a single interface**.



Realize at least a **40% increase in productivity** and **40% decrease in IT spend**.

OneVue*x* ensures seamless data interoperability, eradicating information silos and consolidating all related information from various systems designed for government **into a single record.**

OneVue*x* with IBM Watsonx offers an AI Assistant that automates processes and workflows to simplify tasks, derive meaningful insights, generate reports, and enhance productivity, innovation, and government services.

AI powered communication and collaboration tools empower efficient teamwork and customer interactions.

Customized analytics and dashboards seamlessly integrate various applications. The **data is live** and configurable for predictive analytics. OneVue*x* also facilitates **bidirectional information flow with CRM tools**.

OneVue*x* integrates IBM, Microsoft, and other leading security into a comprehensive solution for **detection, response, and remediation** across all connected systems, protecting sensitive information.
