OneVuex UNIFIED SYSTEMS | IBM Silver Partner

Unifying trusted AI and Cloud Technologies to Accelerate Healthcare Innovation

Healthcare providers experience many challenges that could compromise patient care and healthcare outcomes

- **Silos and data dispersal** impede collaboration and access to patient information that contribute to cross-departmental inefficiencies
- **Outdated technologies and lack of training** on digital solutions cause errors and frustration
- **Manual, repetitive tasks** lead to burnout, limit productivity, and distract from patient care
- **Protecting sensitive health data** and keeping pace with regulatory needs challenging

35-54% of healthcare clinicians suffer from burnout.

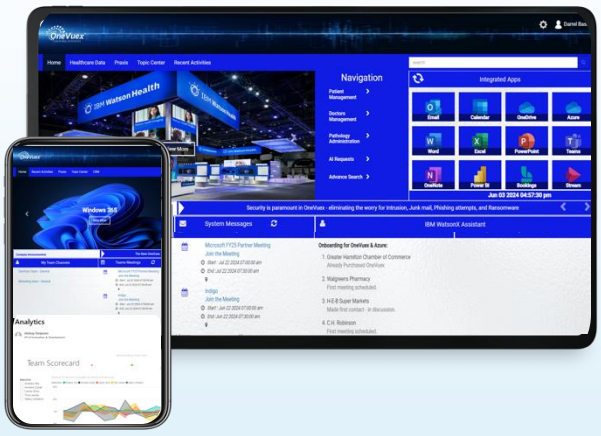
Introducing OneVue*x* Unified Systems

OneVue*x* Unified Systems intelligently integrates **IBM**, **Microsoft**, and other technologies, unifying data across applications, databases, and cloud platforms, displaying related data results **in a single interface**.



Realize at least a **40% increase in productivity** and **40% decrease in IT spend**.

OneVue*x* ensures seamless data interoperability by consolidating all patient information from various systems (such as LIS, EHRs, pharmacy, emails, files, media, internet content, and more) **into a single record.**

OneVue*x* with IBM Watsonx offers an AI Assistant that automates processes to simplify tasks, derive meaningful insights, minimize burnout, and deliver faster, quality patient care.

AI powered communication and collaboration tools empower efficient clinical teamwork.

Customized dashboards provide fully integrated analytics and insights for a total view of your hospital system and patient outcomes.

OneVue*x* integrates IBM, Microsoft, and other leading security into a comprehensive solution for **detection, response, and remediation** across all connected systems, protecting patient and hospital information.

OneVue*x* – Superior Experiences. Greater Insights. Better Care.
